About the Company :

For over 55 years, the name of Kuwait Dairy Company has become tantamount with fresh, high-quality dairy products manufactured from fresh milk produced daily in Kuwait's farms. Kuwait Dairy Company was established in 1960, through an initiative by Kuwaiti farmers aiming to create a sophisticated production and distribution process that serves food security in Kuwait in the first place and achieve a qualitative leap in national potential. Kuwait Dairy Company successfully assumed this responsibility, equipped with ambition, till it developed into one of the largest and most deeply established industrial companies operating in the field of dairy, both locally and on the level of the GCC.

The company runs a variety of production lines on an area of 22 thousand square meters, and a production capacity of 350 tons per day. The company seek to develop its capacity to hit 550 tons per day over the next few years. This massive production capacity is managed by a specialized team with diverse skills and accumulated experience that make it the best in this field, under the supervision and control of an advanced research team which monitors quality and conducts research to ensure meeting all health standards and requirements applicable globally, and to continuously develop business as well. All these steps are conducted via an internationally accredited specialized laboratory established by Kuwait Dairy Company specially for this purpose.

It is worth mentioning that Kuwait Dairy Company is currently working on the construction of its new plant on an area of 70 thousand square meters, which will represent a quantum leap for the company's production and supply capacity.
